5) Action Airlines Air Charter Service- Phone: (800) 243-8623

The Piper Seneca aircraft has a rear door hatch that is more or less at hip height. This is often best for older customers or those with physical challenges, as they can slide in (with assistance).

The Piper Navajo is a larger aircraft that has a rear fold down door hatch with a few steps, thus requiring the passenger to climb in to be seated.

Since passengers book and confirm the trip in advance, there is no need to get a physical ticket or visit any office beforehand. Some airports even allow passengers to drive their vehicle onto the ramp and park alongside the aircraft for easy transfer.

Service animals are accepted, but the airline will need to know about them when booking. Action Airlines does their very best to accommodate their customers and make their experience as comfortable and easy as possible.
